

HERE Location Services

Transit

Navigate the city with public transportation

Seamless connectivity between travel and transit modes

Comprehensive coverage of transit timetables

Complete door-to-door transit experience

The Transit component, part of **HERE Location Services**, provides the best public transit route to any destination, while taking into account schedules and pre-defined routes for various transit modes (e.g. bus, train, subway). Utilizing the HERE road network, HERE Transit gives users a complete door-to-door experience, with everything from walking directions to stations, to information on stops and transfer points along their route.

With coverage in more than 900 cities around the world, HERE Transit calculates and delivers multiple transit options based on arrival or departure times, number of connections, walking distance and travel time.

HERE Transit provides an accurate estimate of travel times for any given trip based on current transit network configuration, stop density, vehicle type and hours of operation. It takes into account transit schedules sourced from Transit Authorities to provide the most accurate journey information to the user. The isoline functionality of HERE Transit allows users to see the location of transit stations that can be reached within a desired travel time, during a specific day of the week. And when walking directions are required to get a user from one transfer stop to another, HERE Transit takes into account a variety of pedestrian-only access points such as stairways, sidewalks, crosswalks and more.

Route directions

- Instructions in over 106 languages
- Distance and walking time to station
- ETA based on transit schedules
- Estimated ETA based on transit network configuration, stop density, vehicle type and hours of operation

Route options

- Transit modes (e.g. bus, train, subway, tram)
- Optimized route: walk distance and speed, number of transfers, first/last mile walk
- Intermediate stops
- Alternative transit segments
- Flexible departure times
- Access point entrance and exit
- Transit platform information
- Real-line geometries
- Fare cost per journey leg

Transit schedules

- Using frequency-based schedules
- Using timetables available in more than 900 cities

Pedestrian routing to transit stations

- Current user location
- Time of the day
- Nearby station search
- Transit isoline (list of reachable stations within a particular amount of time)
- Next departure information (select, nearby, all)
- Optimized route: stairways, sidewalks, crosswalks, bridges, tunnels, elevators, escalators
- Optimized connectivity between travel modes (pedestrian pathways in transfer points, entry/exit points)

Only **HERE Location Services** delivers powerful, flexible and global location cloud services built on enterprise-grade map data. Discover how HERE can help your business run smarter, faster and more efficiently. Today, leading enterprise organizations around the world use **HERE Location Services** in hundreds of customer applications and support core business processes such as fleet management, telematics, geomarketing, business intelligence, field force optimization and more.
