

# HERE Destination Weather

## Enable drivers to stay ahead of changing weather conditions

HERE Destination Weather is a service that can be embedded into navigation systems and deliver weather forecasts to drivers. It provides them with the information they need to avoid inclement weather and stay safe on the road.

HERE Destination Weather sources high-quality data from 280,000 weather observation stations around the globe. The service's proprietary model delivers comprehensive forecasts that combine topography, vegetation, cloud coverage and precipitation. Drivers can be provided with specific forecasts for any location by submitting the desired city name, geographic coordinates, zip code or through free text with the service's flexible search options.

### Automotive, T&L, and Public Sector Use Cases

- Display weather conditions on a map
- Provide weather alerts along driving route

### Global Coverage

Powered by data from more than 280,000 weather observation stations, the service offers global coverage. This eliminates the need to manage inconsistent data, while connecting end-users to a single source of information.

### Data Richness

With 39 alert types, 36 air description values, 77 precipitation descriptors, and 36 temperature descriptors, HERE Destination Weather provides the granularity drivers need to travel safely.

### Full-Range Service Offerings

Minimize multiple supplier contracts by sourcing this service in combination with other HERE connected services, such as Fuel Prices, EV Charge Points, Traffic, and Parking.

# Product features

HERE Destination Weather provides the following information:

- Daily forecasts for up to 7 days
- Hourly forecasts for up to 48 hours
- Weather alerts for next 24 hours
- Daily sunset, sunrise, moonset, and moonrise times
